MONTOPLAS

9 - 11/03/2020

ANTIHUMEDAD E IMPERMEABILIZAC. **FAMILY** LINE

CONSERVACION

DESCRIPTION AND NATURE

Additive with anti-mold preservative. Product used for the conservation of coatings to the water, by the microbial control, in order to protect the surface.

USAGES

Outdoors/Indoors

Plaster

Facades

Cement

Concrete

Cement mortars

Product used to the coating maintenance, through microbial control as to protect the surface

Specific to be added to external coatings and waterbase paints

PROPERTIES

The active materia developes intense and long term reaction

Alacalynity resistance

When added in adecuate proportions, do not change final product properties

stable under direct light

stable at pH between 3 and 13

almost do not produce yellowness or decoloration to the final product

Antiverdin

| TECHNICAL CHARACTERISTCS | | | | |
|---------------------------------|---|--|--|--|
| Referencia Color | MONTOPLAS | | | |
| Mixture relation | Añadir 1L de Montoplast a 20L de pintura plastica | | | |
| Finish | Base painting | | | |
| Specific weight | 0,98± 0,05 kg/l | | | |
| Viscosity | 32 +/- 5 PO | | | |
| Solids in volume | 4± 1 | | | |
| Solids in weight | 5± 1 | | | |
| Aproximated performance by coat | Depending of product usage | | | |
| Dry to touch | Does not alter the drying time of paint | | | |
| Dry to repaint | 3 - 4 h | | | |
| Colours | Light beige. Does not alter the colour of the end product in the recommended dose. Light beige. Does not alter the colour of the end product in the recommended dose. | | | |

SURFACE PREPAIRING

New surfaces

- It is recommended that you prime the base using Montolimp.
- Prime crumbling bases with primer emulsion or Fijamont.
- The same system is recommended on water-based paints, which should be added following the technical specifications.

Restoring and maintenance

- Remove any loose or peeling paint.
- It is recommended that you prime the base using Montolimp.
- Prime crumbling bases with primer emulsion or Fijamont.
